Nested IF Statements – Exercise 2

You have been provided with the following information on the number of cars sold by each salesperson at a car dealership in the last month.

Name of Salesperson	Number of Cars Sold
Mike Harper	32
Leah Underwood	26
Hardeep Singh	28
Ollie Bell	19
Sarah Fowler	27
Ali Abdullah	22
Peter Knight	35
Bryan Drayford	30
Andre Dos Santos	29
Alexandra Best	31

The Sales Manager at the car dealership has told you that:

- ***Anyone who has sold 25 or fewer cars does not get a bonus***
- ***Anyone who has sold between 26 and 30 cars will get a bonus of £100 for each car they sell over 25 cars***
- ***Anyone who has sold over 31 cars will get a bonus of £150 for each car they sell over 25 cars***

Tasks

1. Transfer the data above to an Excel workbook and use Nested 'IF' Statements to calculate the bonus that each person is entitled to receive. You should add in the title 'Bonus Calculation by Salesperson' and rename the worksheet 'Bonuses'.
